SUMMARY

Junior Full-Stack Developer with a backend focus, experienced in building secure and scalable web applications using Node.js, Express.js, React, Next.js, and MongoDB. Skilled in developing REST APIs, authentication and authorization, OAuth, payment integrations, and API security, with a strong focus on clean architecture, maintainable code, and production-ready applications.

SKILLS

Languages
JavaScript, Java

Frontend
React.js, Next.js, Redux, Tailwind CSS, HTML, CSS

Backend
Node.js, Express.js, REST APIs, JWT, RBAC, NextAuth.js, Redis, BullMQ, Razorpay

Databases
MongoDB, SQL

Tools & DevOps
Git, GitHub, Docker, Vercel, VS Code

EDUCATION

Master of Computer Applications (MCA) Expected 2027

Bachelor of Computer Applications (BCA) Completed 2024

PROJECT EXPERIENCE

PassWordMan - Password Manager Application
GitHub: github.com/anass125/PassWordMan | Live: https://pass-word-man.vercel.app

Tech: Node.js, Express.js, MongoDB, React, Redis, JWT, BullMQ, Docker.

- Built a full-stack credential manager providing authenticated access to stored URL, username, and password records, secured via JWT authentication and role-based access control (RBAC).
- Hashed user login credentials with bcrypt for secure authentication.
- Structured REST APIs using routes, controllers, and services to separate concerns and improve maintainability.
- Added Redis caching for frequently accessed credential data to reduce repeated database reads.
- Introduced BullMQ background jobs to move non-critical processing off the request-response path.
- Hardened APIs with Helmet, CORS controls, rate limiting, XSS protection, and MongoDB sanitization.
- Containerized the application with Docker for consistent development and deployment environments.

GetMeAChai - Crowdfunding Platform
GitHub: github.com/anass125/GetMeAChai | Live: get-me-a-chai-rose.vercel.app

Tech: Next.js, MongoDB, NextAuth.js, Razorpay, Tailwind CSS.

- Built a full-stack crowdfunding platform with creator profiles, dashboards, authentication, and payment workflows.
- Implemented Google and GitHub OAuth with NextAuth.js, supporting two social login providers for streamlined onboarding.
- Integrated Razorpay with success and failure handling for end-to-end payment processing.
- Developed creator dashboards and dynamic profile pages using the Next.js App Router with server-side rendering.
- Designed MongoDB schemas for user, creator, and payment data with clear relationships and application-level validation.
- Built responsive UI across navigation, dashboards, payment flows, and supporting pages for mobile and desktop.
